### **Smoke detectors**

**Units:** About 452,000 in the U.S. and 40,000 in Canada

**Hazard:** A yellow cap left on during the manufacturing process can cover one of the two smoke sensors and compromise the smoke alarm's ability to detect smoke, posing a risk of consumers not being alerted to a fire in their home.

**Description:** Models PI2010 (AC/hardwired) and PI9010 (DC/battery powered) of Kidde dual sensor (photoelectric and ionization) smoke alarms are recalled. KIDDE is printed on the front of the smoke alarm. The model number and date code 2016 Sep. 10 through 2017 Oct. 13 are printed on the back of the alarm.

**Sold at:** Menards, The Home Depot, Walmart and other department, home and hardware stores nationwide and online at Amazon.com, ShopKidde.com and other websites from September 2016 through January 2018 for \$20 to \$40.

**Remedy:** Remove the alarm from the wall/ceiling and look through the opening on the side of the alarm to see if there is a yellow cap. If there is a yellow cap, contact Kidde for instructions and a free replacement smoke alarm. Do not try to take apart the alarm, open the casing or remove the yellow cap. Remove and discard the recalled smoke alarm only after receiving and installing the replacement alarm. If no yellow cap is present, reinstall the smoke alarm.
