---

Does your practice use the two-dose human papillomavirus (HPV) vaccine? The following resources will help adhere to this protocol.

**Technology.** HPV Vaccine: Same Way, Same Day is a brief, interactive role-play simulation that helps you practice introducing the HPV vaccine and address concerns of parents who are hesitant about the vaccine. Download the free resource from Google Play (<http://bit.ly/2jvVak>) or the Apple App Store (<https://apple.co/2leJYQR>).

**Partnerships.** The link between oropharyngeal cancer and HPV is another reason why patients must complete the HPV immunization series. Enlist dental professional colleagues in educating patients with these posters, <http://bit.ly/2KC5i1p>.

**Education.** You wouldn't tell teens to wear a seat belt only when they think they might get into a car accident, says Linda Fu, M.D., M.S., FAAP. Why wait until a teen is sexually active to receive the HPV vaccine? A pediatrician panel talks about the HPV vaccine series in this free continuing medical education video on the Centers for Disease Control and Prevention website, <http://bit.ly/2lhmzOO>.
