

Deadline to apply for Resident Research Grants is Feb. 28

December 26, 2019

from AAP Research

Article type: [Research Update](#)

Pediatric residents have an opportunity to initiate and complete projects related to their professional interests through the AAP Resident Research Grant program.

Qualifying residents receive \$2,000 grants for projects related to a variety of child health research topics. Residents also are provided a travel stipend to attend a professional research conference. Award winners conduct their research under the supervision of a mentor who is an AAP member. Research projects are conducted for up to two years and should be completed during residency training.

The AAP Committee on Pediatric Research Subcommittee on Resident Research Grants selects the recipients each year based on criteria focused on project methodology, significance of the topic, feasibility of completion during residency and project relevance to the resident's career goals. The program is designed to encourage residents with limited research experience to apply and to begin academic careers in research.

2019 Resident Research Grant recipients

Name and mentor	Program name	Title of research project
Adrienne Cheng M.D. Mentor: Priyadarshani Giri, M.D., FAAP	Hofstra Northwell School of Medicine at Staten Island University Hospital	Effect of Maternal Fentanyl Use on the Neonate
Sarah Kollar, D.O. Mentor: Olga Toro-Salazar, M.D., FAAP	University of Connecticut	Use of Segmental Displacement in the Assessment of Volume and Pressure Overload by Cardiac Magnetic Resonance Imaging in Patients with Repaired Tetralogy of Fallot
Jessica Mayer, M.D. Mentor: Zeynep Salih, M.D., FAAP	Indiana University	NICU Moms Support Group
Rachel Rosenthal, M.D. Mentor: Gina Kim, M.D., FAAP	Los Angeles County and University of Southern California Medical Center	Sleep Hygiene in the Pediatric ICU: Analyzing Opportunities for Decreasing Overnight Interruptions and Improving Patient Quality of Sleep
Kamel Shibbani, M.D. Mentor: Patrick McNamara, M.D., FAAP	University of Iowa Hospital and Clinics	Understanding the Role of Steroid Use in Preterm Infants who Develop Post Ligation Cardiac Syndrome after Surgical Closure of Patent Ductus Arteriosus
Hanna (John) Tadros, M.D. Mentor: Dipankar Gupta, M.D., FAAP	University of Florida	Parental Decision Making in Congenital Heart Disease and Pediatric Heart Transplant Patients: A Cross-sectional Study to Assess Parental Preferences
Elsa Treffeisen, M.D. Mentor: Omolara Uwemedimo, M.D., FAAP	Cohen Children's Medical Center, Hofstra Northwell School of Medicine	Social and Environmental Risk Factors for Atopy in a Low-income Urban Immigrant Pediatric Population
