

## Supplemental Information

Q:14 **SUPPLEMENTAL TABLE 3** Summary of Agreement Between Gold Standard and Other Observers

Variable	$\kappa$
Provider discussed and reviewed discharge diagnosis	0.7640
Provider reviewed home instruction and contingency plan (things to do and/or try)	NA <sup>a</sup>
Provider discussed and reviewed follow-up appointments	NA <sup>a</sup>
Provider discussed and reviewed reasons to call PCP	1.0000
Provider discussed and reviewed reasons to come to ED	1.0000
Provider prompted patient and/or caregivers to ask questions and provide clarification	NA <sup>a</sup>
Provider prompted patient and/or caregiver to teach-back	1.0000
Family asked questions and provided clarification (with or without provider prompt, exclude simple “no”)	0.7113
Family appeared engaged	NA <sup>a</sup>

A subset of 56 observations were used to test agreement: 28 for gold standard (A.Y.C.) and 7 each (a total of 28) for the other 4 observers (E.A., V.W., M.D., and D.M.). NA, not applicable; PCP, primary care provider.

<sup>a</sup>  $\kappa$  was not calculated because both observers responded yes for all or all but 1 encounter.
