

Supplemental Information

How certain are you
about your patient's diagnosis?

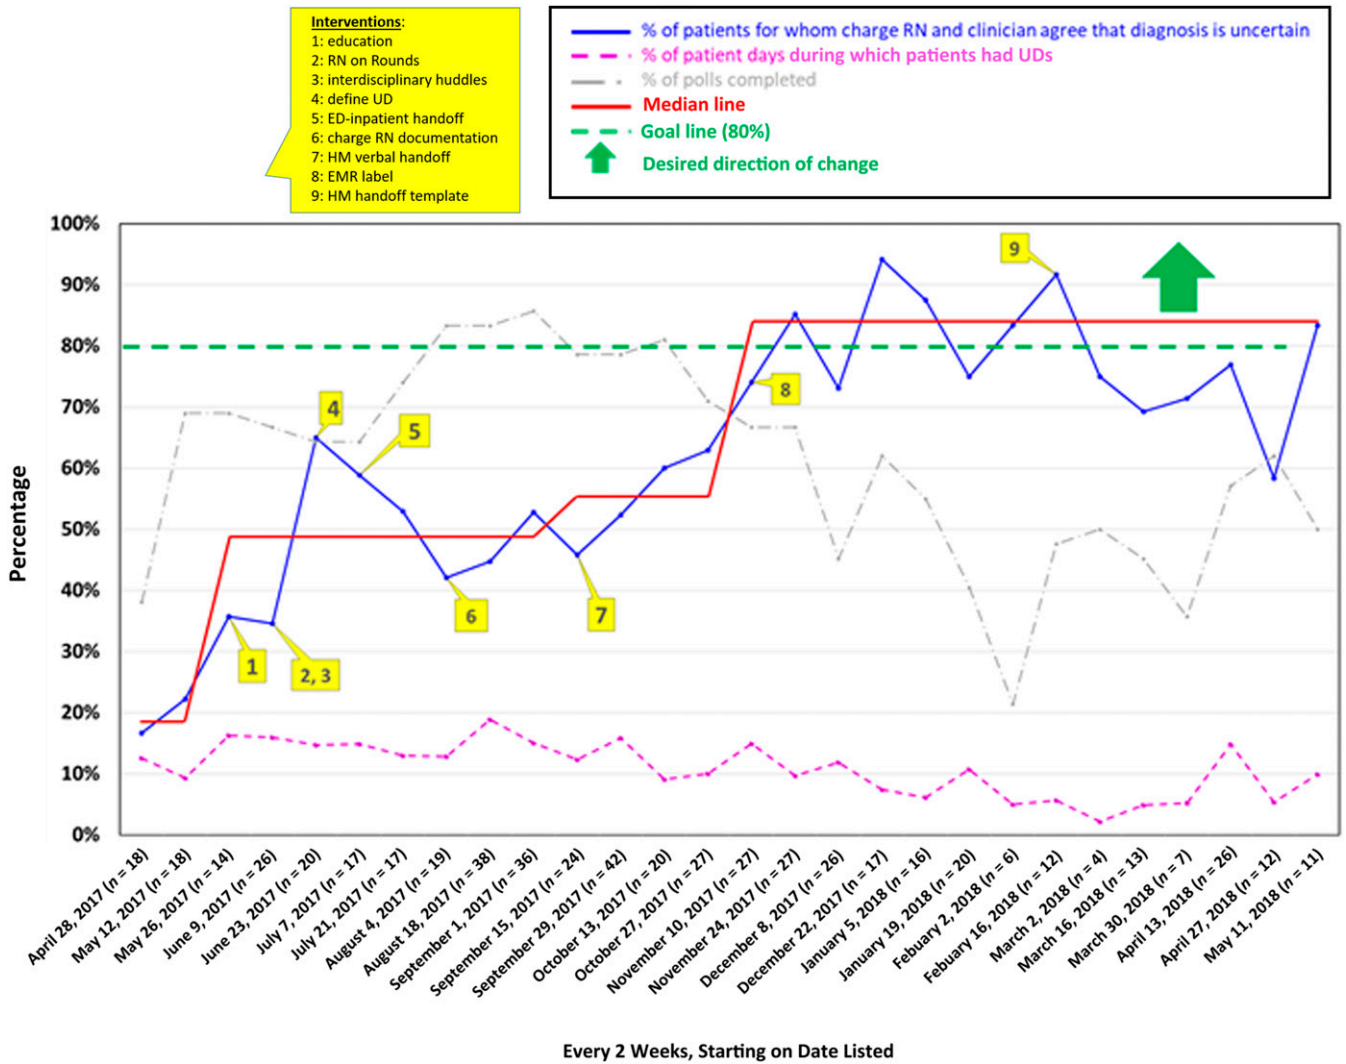

Liberty staff are working on a QI project to improve the care of patients for whom we may have the wrong diagnosis.

The first step is to identify patients for whom we may be on the wrong track.

Please talk to your charge RN and clinical team about any patient concerns you have.

SUPPLEMENTAL FIGURE 4 Poster displayed in clinician and RN break rooms to raise awareness of diagnostic uncertainty (PDSA 1).

SUPPLEMENTAL FIGURE 5 A run chart reveals the agreement about patients with UDs, the percentage of patient days during which patients had UDs, and the percentage of polls completed over time.
