

Supplemental Information

SUPPLEMENTAL FIGURE 3 Doses of acyclovir by ME panel testing.

SUPPLEMENTAL TABLE 3 Excluded ICD-10 Codes

(ICD-10 Code) ICD-10 Description

(A41.01) Methicillin susceptible <i>Staphylococcus aureus</i> septicemia
(A41.51) Sepsis due to <i>Escherichia coli</i>
(A41.89) Sepsis Gram positive
(A49.1) Streptococcal infection
(A49.8*) Infection <i>Klebsiella; Escherichia coli</i> infection
(A49.9) Extended spectrum β -lactamase producing bacteria infection
(A87.0) Enteroviral meningitis
(A87.9) Viral meningitis
(B00.9) Herpesviral infection unspecified
(G00.8 ^a) Other bacterial meningitis; <i>Escherichia coli</i> meningitis
(G00.9 ^a) Bacterial meningitis unspecified; Possible Bacterial meningitis; Gram negative meningitis
(G01) Meningitis in bacterial diseases classified elsewhere
(G04.90) Meningoencephalitis
(G06.2) Subdural empyema
(H05.011) Orbital cellulitis right
(H05.019) Orbital abscess
(J15.8) Pneumonia because of other specified bacteria
(J15.9) Bacterial pneumonia
(J18.9) Pneumonia
(K11.21) Parotitis acute
(L00) Staphylococcal scalded skin syndrome
(L02.11) Neck abscess
(L02.91) Abscess
(L02.216) Abscess umbilical
(L03.90) Cellulitis
(L03.211) Facial cellulitis
(L03.311) Cellulitis of abdominal wall
(L03.317) Cellulitis of buttock
(M00.9) Septic arthritis of shoulder right
(N10) Acute pyelonephritis
(N12) <i>Escherichia coli</i> pyelonephritis
(N30.00) Acute cystitis without hematuria
(N39.0 ^a) Urinary tract infection; Urinary tract infection because of <i>Enterococcus; Escherichia coli</i> urinary tract infection; Urinary tract infection because of extended-spectrum β lactamase producing <i>Escherichia coli</i>
(N61.1) Breast abscess
(P36.0) Sepsis of newborn because of <i>Streptococcus</i> group B
(R78.81) Bacteremia; Gram-negative bacteremia; <i>Escherichia coli</i> bacteremia

^a Some ICD-10 descriptions have the same ICD-10 code.
