Supplemental Information

Children may experience stressful events, which may affect their health and well-being. The next questions will explore different types of stressful experiences that your child may have experienced. This includes questions about violence, abuse, loss, and potentially frightening experiences. For any experience that your child has had, I will ask you how s/he was affected by the experience. For any experiences with abuse or neglect that you report, I’ll need to ask if these have already been reported to DCFS. I’ll let you know before I ask any of those questions. Let me know if you have any questions now or during the survey.

The next few questions are questions about abuse or neglect that your child may have experienced. As I mentioned before, all of the parents we are interviewing for this project have a recent history of DCFS involvement with a child, so we expect that most parents will answer yes to one or more of these questions. When you do report an experience with abuse or neglect, I will just ask if DCFS is aware of this. If DCFS is aware, I don’t need to do anything else. If DCFS is not aware, I will need to ask a few more questions to understand whether this needs to be reported.
