

# Supplemental Information

**SUPPLEMENTAL TABLE 6** Ancillary Abdominal Imaging Studies

Name of Abdominal Imaging Study
CT abdomen pelvis with and without contrast
CT abdomen with contrast
CT abdomen without contrast
CT abdomen and appendix with contrast
CT abdomen and pelvis with contrast
CT abdomen and pelvis without contrast
CT chest, abdomen, and pelvis with contrast
CT neck chest abdomen and pelvis with contrast
CT pelvis without contrast
Fluoroscopy contrast enema
Fluoroscopy upper gastrointestinal series
MRI abdomen gallbladder protocol with and without contrast
MRI abdomen gallbladder protocol without contrast
MRI abdomen with and without contrast
MRI abdomen without contrast
MRI abdomen and pelvis with and without contrast
MRI abdomen and pelvis without contrast
MRI appendicitis
MRI enterography small bowel with and without contrast
MRI pelvis with and without contrast
MRI pelvis without contrast
Ultrasound abdomen
Ultrasound abdomen Doppler with elastography
Ultrasound abdomen pelvis with limited Doppler
Ultrasound abdomen with complete Doppler
Ultrasound for intussusception
Ultrasound gallbladder
Ultrasound limited abdomen suspicious for appendicitis
Ultrasound limited abdomen
Ultrasound limited abdomen for abscess
Ultrasound limited abdomen for appendicitis
Ultrasound limited abdomen with complete Doppler
Ultrasound limited abdomen with Doppler
Ultrasound limited abdomen with limited Doppler
Ultrasound pelvis limited
Ultrasound pelvis transabdominal with complete Doppler
Ultrasound pelvis transabdominal with limited Doppler
Radiograph abdomen 1 view
Radiograph abdomen 2 views
Radiograph abdomen 3 views
Radiograph abdomen 3 views for intussusception

CT, computed tomography.
