

CONTENTS

ALLERGY*Prediction, Prevention, and the “Hygiene Hypothesis”*

- S3 Allergen Exposure in Infancy and the Development of Sensitization, Wheeze, and Asthma at 4 Years
- S3 Breast-feeding Reduces the Risk for Childhood Eczema
- S4 The Association of Prolonged Breastfeeding and Allergic Disease in Poor Urban Children
- S4 Infantile Eczema at One Month of Age Is Associated With Cord Blood Eosinophilia and Subsequent Development of Atopic Dermatitis and Wheezing Illness Until Two Years of Age
- S5 Risk Factors for Atopic Dermatitis in New Zealand Children at 3.5 Years of Age
- S5 BCG Immunization at Birth and Atopic Diseases in a Homogeneous Population of Spanish Schoolchildren
- S6 Hospitalization for RSV Bronchiolitis Before 12 Months of Age and Subsequent Asthma, Atopy and Wheeze: A Longitudinal Birth Cohort Study
- S6 Early Respiratory Infections, Asthma, and Allergy: 10-Year Follow-up of the Oslo Birth Cohort
- S7 Exposure to Pets, and the Association With Hay Fever, Asthma, and Atopic Sensitization in Rural Children
- S8 Early Childhood Environment Related to Microbial Exposure and the Occurrence of Atopic Disease at School Age
- S8 Individual and Neighborhood-Level Factors in Predicting Asthma
- S9 The Canadian Childhood Asthma Primary Prevention Study: Outcomes at 7 Years of Age
- S9 The PREVASC Study: The Clinical Effect of a Multifaceted Educational Intervention to Prevent Childhood Asthma
- S10 Asthma in Remission: Can Relapse in Early Adulthood Be Predicted at 18 Years of Age?
- S10 Adult Asthma Severity in Individuals With a History of Childhood Asthma

Allergens and Environmental Exposures

- S11 Inner City Asthma Study: Relationships Among Sensitivity, Allergen Exposure, and Asthma Morbidity
- S12 Initial High-Dose Nasal Allergen Exposure Prevents Allergic Sensitization to a Neoantigen

Food Allergy

- S12 The Natural History of Tree Nut Allergy
- S13 Prevalence and Outcome of Allergic Colitis in Healthy Infants With Rectal Bleeding: A Prospective Cohort Study
- S13 Food Allergen Sensitization in Inner-City Children With Asthma
- S14 Risk of Celiac Disease Autoimmunity and Timing of Gluten Introduction in the Diet of Infants at Increased Risk of Disease

CONTENTS

- S15 A National Prospective Study on Childhood Celiac Disease in the Netherlands 1993–2000: An Increasing Recognition and a Changing Clinical Picture

Atopic Dermatitis

- S15 Long-term Treatment of Atopic Dermatitis With Pimecrolimus Cream 1% in Infants Does Not Interfere With the Development of Protective Antibodies After Vaccination
- S16 Efficacy and Safety of Tacrolimus Ointment Treatment for up to 4 Years in Patients With Atopic Dermatitis
- S16 Efficacy and Tolerability of Pimecrolimus and Tacrolimus in the Treatment of Atopic Dermatitis: Meta-analysis of Randomised Controlled Trials
- S17 Effects of Probiotics on Atopic Dermatitis: A Randomised Controlled Trial

Anaphylaxis

- S18 Allergic Reactions in the Community: A Questionnaire Survey of Members of the Anaphylaxis Campaign
- S18 Parental Use of EpiPen for Children With Food Allergies
- S19 Recognition, Evaluation, and Treatment of Anaphylaxis in the Child Care Setting
- S19 Differences in Race, Ethnicity, and Socioeconomic Status in Schoolchildren Dispensed Injectable Epinephrine in 3 Massachusetts School Districts

Drug Allergy

- S20 Immediate Allergic Reactions to Cephalosporins and Penicillins and Their Cross-Reactivity in Children
- S20 Hypersensitivity Reactions to Paracetamol in Children: A Study of 25 Cases
- S21 A Review of Evidence Supporting the American Academy of Pediatrics Recommendation for Prescribing Cephalosporin Antibiotics for Penicillin-Allergic Patients

THE UPPER AIRWAY

- S22 A Prospective, Randomized, Double-Blind, Placebo-Controlled Multi-Centre Study on the Efficacy and Safety of Sublingual Immunotherapy (SLIT) in Children With Seasonal Allergic Rhinoconjunctivitis to Grass Pollen
- S22 The Safety of Sublingual-Swallow Immunotherapy: An Analysis of Published Studies
- S23 The Efficacy and Safety of Heat-Killed *Lactobacillus paracasei* for Treatment of Perennial Allergic Rhinitis Induced by House-Dust Mite
- S23 Surgical Management of Chronic Sinusitis in Children

ASTHMA

Pathophysiology

- S25 Asthmatic Bronchial Epithelial Cells Have a Deficient Innate Immune Response to Infection With Rhinovirus
- S25 IL-19 Induced Th2 Cytokines and Was Up-regulated in Asthma Patients
- S26 Inflammatory Basis of Exercise-Induced Bronchoconstriction
- S27 Induction and Inhibition of the Th2 Phenotype Spread: Implications for Childhood Asthma
- S27 Self-Organized Patchiness in Asthma as a Prelude to Catastrophic Shifts
- S28 The Bronchial Lavage of Pediatric Patients With Asthma Contains Infectious *Chlamydia*
- S28 Repeat Exercise Normalizes the Gas-Exchange Impairment Induced by a Previous Exercise Bout in Asthmatic Subjects

CONTENTS

- S29 **An Immunoepidemiological Approach to Asthma: Identification of in-Vitro T-Cell Response Patterns Associated With Different Wheezing Phenotypes in Children**
- S30 **Wheeze Phenotypes and Lung Function in Preschool Children**
- S30 **Asthma Phenotypes, Risk Factors, and Measures of Severity in a National Sample of US Children**

Diagnosis and Management

- S31 **Bacterial Contamination of Spacer Devices Used by Asthmatic Children**
- S31 **Clinical Use of Noninvasive Measurements of Airway Inflammation in Steroid Reduction in Children**
- S32 **The Influence of Pulmonary Function Testing on the Management of Asthma in Children**
- S33 **Titration of Steroids on Exhaled Nitric Oxide in Children With Asthma: A Randomized, Controlled Trial**
- S33 **Use of Exhaled Nitric Oxide Measurements to Guide Treatment in Chronic Asthma**
- S34 **The Prevalence of Ibuprofen-Sensitive Asthma in Children: A Randomized Controlled Bronchoprovocation Challenge Study**
- S34 **Patterns of Quick-Relief and Long-term Controller Medication Use in Pediatric Asthma**
- S35 **Asthma as a Risk Factor for Invasive Pneumococcal Disease**
- S35 **Exercise-Induced Dyspnea in Children and Adolescents: If Not Asthma Then What?**
- S36 **Predictors of Primary Care Follow-up After a Pediatric Emergency Visit for Asthma**
- S36 **Use of Asthma Guidelines by Primary Care Providers to Reduce Hospitalizations and Emergency Department Visits in Poor, Minority, Urban Children**
- S37 **A Multisite Randomized Trial of the Effects of Physician Education and Organizational Change in Chronic Asthma Care: Cost-effectiveness Analysis of the Pediatric Asthma Care Patient Outcomes Research Team II (PAC-PORT II)**
- S38 **A Randomized Trial of Primary Care Provider Prompting to Enhance Preventive Asthma Therapy**
- S38 **Asthma-Related Health Care Resource Use Among Asthmatic Children With and Without Concomitant Allergic Rhinitis**
- S39 **Learning Preferences of Caregivers of Asthmatic Children**
- S39 **Racial and Ethnic Differences in Asthma Diagnosis Among Children Who Wheeze**
- S40 **Screening for Children's Exposure to Environmental Tobacco Smoke in a Pediatric Primary Care Setting**

Medical Therapies

- S41 **Daily Versus As-Needed Corticosteroids for Mild Persistent Asthma**
- S41 **Safety of Budesonide Inhalation Suspension in Infants Aged Six to Twelve Months With Mild to Moderate Persistent Asthma or Recurrent Wheeze**
- S42 **Long-term Safety of Once-Daily Budesonide in Patients With Early-Onset Mild Persistent Asthma: Results of the Inhaled Steroid Treatment as Regular Therapy in Early Asthma (START) Study**
- S42 **Budesonide/Formoterol Combination Therapy as Both Maintenance and Reliever Medication in Asthma**
- S43 **Characterization of Within-Subject Responses to Fluticasone and Montelukast in Childhood Asthma**
- S44 **Comparative Efficacy and Safety of Low-Dose Fluticasone Propionate and Montelukast in Children With Persistent Asthma**
- S44 **Montelukast, Compared With Fluticasone, for Control of Asthma Among 6- to 14-Year-Old Patients With Mild Asthma: The Mosaic Study**

CONTENTS

- S45 **Montelukast Reduces Asthma Exacerbations in 2- to 5-Year-Old Children With Intermittent Asthma**
- S45 **A Meta-analysis on Intravenous Magnesium Sulphate for Treating Acute Asthma**

IMMUNODEFICIENCY

Primary Immunodeficiency

- S47 **Development of Population-Based Newborn Screening for Severe Combined Immunodeficiency**
- S47 **Presenting Phenotype in 100 Children With the 22q11 Deletion Syndrome**
- S48 **Mutations in TNFRSF13B Encoding TACI Are Associated With Common Variable Immunodeficiency in Humans**
TACI Is Mutant in Common Variable Immunodeficiency and IgA Deficiency
- S48 **Gene Therapy of X-Linked Severe Combined Immunodeficiency by Use of a Pseudotyped Gammaretroviral Vector**
- S49 **Pediatric Hypereosinophilic Syndrome (HES) Differs From Adult HES**

Human Immunodeficiency Virus

- S50 **HIV-Infected Individuals Receiving Effective Antiviral Therapy for Extended Periods of Time Continually Replenish Their Viral Reservoir**
- S50 **Emergence of Drug Resistant HIV-1 After Intrapartum Administration of Single-Dose Nevirapine Is Substantially Underestimated**
- S51 **Depletion of Latent HIV-1 Infection in Vivo: A Proof-of-Concept Study**
- S51 **Paradoxical CD4⁺ T-Cell Decline in HIV-Infected Patients With Complete Virus Suppression Taking Tenofovir and Didanosine**
- S52 **Massive Infection and Loss of Memory CD4⁺ T Cells in Multiple Tissues During Acute SIV Infection**

INFECTIOUS DISEASE

- S53 **Missed Opportunities for Influenza Vaccination in Children With Chronic Medical Conditions**
- S53 **Identification of a Universal Group B *Streptococcus* Vaccine by Multiple Genome Screen**
- S54 **Passive Immunization During Pregnancy for Congenital Cytomegalovirus Infection**
- S54 **Information Leaflet and Antibiotic Prescribing Strategies for Acute Lower Respiratory Tract Infection: A Randomized, Controlled Trial**
