

## CONTENTS

- S103 About this Synopsis Book  
 S105 A Synopsis of the Synopses, 2008–2009

**ALLERGY***Prediction, Prevention, and the “Hygiene Hypothesis”*

- S107 Age at First Introduction of Cow Milk Products and Other Food Products in Relation to Infant Atopic Manifestations in the First 2 Years of Life: The KOALA Birth Cohort Study  
 S107 Antibiotic Use in the First Year of Life and Risk of Atopic Disease in Early Childhood  
 S108 The Association of Early Life Exposure to Antibiotics and the Development of Asthma, Eczema and Atopy in a Birth Cohort: Confounding or Causality?  
 S109 Association Between Obesity and Atopy in Chinese Schoolchildren  
 S109 Association of Obesity With IgE Levels and Allergy Symptoms in Children and Adolescents: Results From the National Health and Nutrition Examination Survey 2005–2006  
 S110 Association Between Paracetamol Use in Infancy and Childhood, and Risk of Asthma, Rhinoconjunctivitis, and Eczema in Children Aged 6–7 Years: Analysis From Phase Three of the ISAAC Programme  
 S110 Allergic Disease and Atopic Sensitization in Children in Relation to Measles Vaccination and Measles Infection  
 S111 Relevance of the Hygiene Hypothesis to Early vs. Late Onset Allergic Rhinitis  
 S112 Probiotic Supplementation in the First 6 Months of Life in at Risk Asian Infants: Effects on Eczema and Atopic Sensitization at the Age of 1 Year  
 S112 Impact of Maternal Atopy and Probiotic Supplementation During Pregnancy on Infant Sensitization: A Double-Blind Placebo-Controlled Study  
 S113 Cord Blood Allergen-Specific IgE Is Associated With Reduced IFN- $\gamma$  Production by Cord Blood Cells: The Protection Against Allergy–Study in Rural Environments (PASTURE) Study

*Allergens and Environmental Exposures*

- S114 Early Exposure and Sensitization to Cat and Dog: Different Effects on Asthma Risk After Wheezing in Infancy  
 S115 Can the Use of HEPA Cleaners in Homes of Asthmatic Children and Adolescents Sensitized to Cat and Dog Allergens Decrease Bronchial Hyperresponsiveness and Allergen Contents in Solid Dust?  
 S115 Higher Immunoglobulin E Antibody Levels to Recombinant Fel D 1 in Cat-Allergic Children With Asthma Compared With Rhinoconjunctivitis

*Tobacco and Air Pollution*

- S116 Atopic Diseases, Allergic Sensitization, and Exposure to Traffic-Related Air Pollution in Children  
 S116 Changes in Environmental Tobacco Smoke Exposure and Asthma Morbidity Among Urban School Children

# CONTENTS

- S117 **Less Air Pollution Leads to Rapid Reduction of Airway Inflammation and Improved Airway Function in Asthmatic Children**

## *Food Allergy and Anaphylaxis*

- S118 **A Randomized, Double-Blind, Placebo-Controlled Study of Milk Oral Immunotherapy for Cow's Milk Allergy**
- S118 **Early Consumption of Peanuts in Infancy Is Associated With a Low Prevalence of Peanut Allergy**
- S119 **Dietary Advice, Dietary Adherence and the Acquisition of Tolerance in Egg-Allergic Children: A 5-yr Follow-up**
- S120 **Effect of Maternal Egg Consumption on Breast Milk Ovalbumin Concentration**
- S121 **The Natural History of Wheat Allergy**
- S121 **High Levels of IgG<sub>4</sub> Antibodies to Foods During Infancy Are Associated With Tolerance to Corresponding Foods Later in Life**
- S122 **The Use of Serum-Specific IgE Measurements for the Diagnosis of Peanut, Tree Nut, and Seed Allergy**
- S123 **In Vitro and In Vivo Cross-reactivity Studies of Legume Allergy in a Mediterranean Population**
- S123 **Epidemiology of Atopy Patch Tests With Food and Inhalant Allergens in an Unselected Population of Children**
- S124 **14 Years of Eosinophilic Esophagitis: Clinical Features and Prognosis**
- S124 **Predictors of Response to Proton Pump Inhibitor Therapy Among Children With Significant Esophageal Eosinophilia**
- S125 **Food Protein-Induced Enterocolitis Syndrome: 16-Year Experience**
- S126 **Prospective Follow-up Oral Food Challenge in Food Protein-Induced Enterocolitis Syndrome**
- S126 **Rice: A Common and Severe Cause of Food Protein-Induced Enterocolitis Syndrome**
- S127 **Impact of Peanut Allergy on Quality of Life, Stress and Anxiety in the Family**
- S127 **Evaluation of a Group Intervention for Children With Food Allergy and Their Parents**
- S128 **Use of Multiple Doses of Epinephrine in Food-Induced Anaphylaxis in Children**
- S128 **Epinephrine Auto-injectors: First-Aid Treatment Still Out of Reach for Many at Risk of Anaphylaxis in the Community**

## *Atopic Dermatitis and Allergic Skin Disease*

- S129 **Association of Staphylococcal Superantigen-Specific Immunoglobulin E With Mild and Moderate Atopic Dermatitis**
- S130 **Methicillin-Resistant *Staphylococcus aureus* Colonization in Children With Atopic Dermatitis**
- S130 **Treatment of *Staphylococcus aureus* Colonization in Atopic Dermatitis Decreases Disease Severity**
- S131 **IL-21R Is Essential for Epicutaneous Sensitization and Allergic Skin Inflammation in Humans and Mice**
- S131 **Intermittent Therapy for Flare Prevention and Long-term Disease Control in Stabilized Atopic Dermatitis: A Randomized Comparison of 3-Times-Weekly Applications of Tacrolimus Ointment Versus Vehicle**
- S132 **Three Times Weekly Tacrolimus Ointment Reduces Relapse in Stabilized Atopic Dermatitis: A New Paradigm for Use**
- S132 **MAS063DP Is Effective Monotherapy for Mild to Moderate Atopic Dermatitis in Infants and Children: A Multicenter, Randomized, Vehicle-Controlled Study**

# CONTENTS

## THE UPPER AIRWAY/ALLERGIC RHINITIS

- S134 Adenoidectomy Outcomes in Pediatric Rhinosinusitis: A Meta-analysis
- S134 Effect of Adenoidectomy on Respiratory Function: A Randomised Prospective Study
- S135 Immunopathology of Chronic Rhinosinusitis in Young Children

## ASTHMA

### *Pathophysiology*

- S136 Wheezing Rhinovirus Illnesses in Early Life Predict Asthma Development in High-Risk Children
- S136 Evidence of a Causal Role of Winter Virus Infection During Infancy in Early Childhood Asthma
- S137 Acute, But Not Resolved, Influenza A Infection Enhances Susceptibility to House Dust Mite-Induced Allergic Disease
- S138 Alveolar Macrophage Phagocytosis Is Impaired in Children With Poorly Controlled Asthma
- S138  $\beta_2$ -Adrenergic Receptor Polymorphisms Affect Response to Treatment in Children With Severe Asthma Exacerbations
- S139 Chromosome 17q21 Gene Variants Are Associated With Asthma and Exacerbations But Not Atopy in Early Childhood
- S139 Serum Vitamin D Levels and Markers of Severity of Childhood Asthma in Costa Rica
- S140 TH17 Cells Mediate Steroid-Resistant Airway Inflammation and Airway Hyperresponsiveness in Mice

### *Diagnosis and Management*

- S140 Wheezing and Bronchial Hyper-responsiveness in Early Childhood as Predictors of Newly Diagnosed Asthma in Early Adulthood: A Longitudinal Birth-Cohort Study
- S141 Predicting an Asthma Exacerbation in Children 2 to 5 Years of Age
- S142 Evaluation of Chronic Cough in Children
- S142 Severe Exacerbations in Children With Mild Asthma: Characterizing a Pediatric Phenotype
- S143 Modifiable Risk Factors for Suboptimal Control and Controller Medication Underuse Among Children With Asthma
- S144 Parenting Asthmatic Children: Identification of Parenting Challenges
- S144 Patterns of Asthma Control Perception in Adolescents: Associations With Psychosocial Functioning
- S145 Effects of Improved Home Heating on Asthma in Community Dwelling Children: Randomised Controlled Trial
- S145 Association of Early Life Wheeze and Lung Function
- S146 Seasonal Patterns in Health Care Use and Pharmaceutical Claims for Asthma Prescriptions for Preschool- and School-Aged Children
- S147 Management of Asthma Based on Exhaled Nitric Oxide in Addition to Guideline-Based Treatment for Inner-City Adolescents and Young Adults: A Randomised Controlled Trial

### *Medical Therapies*

- S147 Episodic Use of an Inhaled Corticosteroid or Leukotriene Receptor Antagonist in Preschool Children With Moderate-To-Severe Intermittent Wheezing
- S148 Daily Versus As-Needed Inhaled Corticosteroid for Mild Persistent Asthma (The Helsinki Early Intervention Childhood Asthma Study)

# CONTENTS

- S149 **Preemptive Use of High-Dose Fluticasone for Virus-Induced Wheezing in Young Children**
- S149 **Effect of Long-term Corticosteroid Use on Bone Mineral Density in Children: A Prospective Longitudinal Assessment in the Childhood Asthma Management Program (CAMP) Study**
- S150 **Long-term Budesonide or Nedocromil Treatment, Once Discontinued, Does Not Alter the Course of Mild to Moderate Asthma in Children and Adolescents**
- S151 **Oral Prednisolone for Preschool Children With Acute Virus-Induced Wheezing**

## **IMMUNOTHERAPY**

- S152 **Efficacy and Safety of 5-Grass-Pollen Sublingual Immunotherapy Tablets in Pediatric Allergic Rhinoconjunctivitis**
- S152 **The Safety of Sublingual Immunotherapy With One or Multiple Pollen Allergens in Children**
- S153 **Safety and Immunogenicity of a Cluster Specific Immunotherapy in Children With Bronchial Asthma and Mite Allergy**

## **PRIMARY AND SECONDARY IMMUNODEFICIENCY**

- S154 **Pyogenic Bacterial Infections in Humans With MyD88 Deficiency**
- S154 **Common Variable Immunodeficiency: 20-Yr Experience at a Single Centre**
- S155 **Gene Therapy for Immunodeficiency Due to Adenosine Deaminase Deficiency**
- S156 **Cutting Edge: Unusual NK Cell Responses to HIV-1 Peptides Are Associated With Protection Against Maternal-Infant Transmission of HIV-1**
- S156 **T Cell-Specific siRNA Delivery Suppresses HIV-1 Infection in Humanized Mice**
- S157 **Timing of HAART Defines the Integrity of Memory B Cells and the Longevity of Humoral Responses in HIV-1 Vertically-Infected Children**
- S157 **Maraviroc for Previously Treated Patients With R5 HIV-1 Infection**
- S158 **Raltegravir With Optimized Background Therapy for Resistant HIV-1 Infection**
- S159 **Long-term Control of HIV by CCR5 Delta32/Delta32 Stem-Cell Transplantation**

doi:10.1542/peds.2009-1870A
