

CONTENTS

- S1 SECTION ON ALLERGY AND IMMUNOLOGY
- S2 ABOUT THIS SYNOPSIS BOOK
- S3 A SYNOPSIS OF THE SYNOPSES, 2018 to 2019

ALLERGY

Risk Factors, Prevention, and the Hygiene Hypothesis

- S5 Temporal and Long-term Gut Microbiota Variation in Allergic Disease: A Prospective Study from Infancy to School Age
- S5 Effects of *Lactobacillus rhamnosus* HN001 in Early Life on the Cumulative Prevalence of Allergic Disease to 11 Years
- S6 The Protective Effect of Cheese Consumption at 18 Months on Allergic Diseases in the First 6 Years
- S7 Neonates Colonized With Pathogenic Bacteria in the Airways Have a Low-Grade Systemic Inflammation
- S7 Dog Ownership at Three Months of Age Is Associated With Protection Against Food Allergy
- S8 Maternal Dietary Antioxidant Intake in Pregnancy and Childhood Respiratory and Atopic Outcomes: Birth Cohort Study
- S9 Antenatal Vitamin D Exposure and Childhood Eczema, Food Allergy, Asthma and Allergic Rhinitis at 2 and 5 Years of Age in the Atopic Disease-Specific Cork BASELINE Birth Cohort Study
- S9 Direct Infant UV Light Exposure Is Associated With Eczema and Immune Development
- S10 Association Between the Age of Solid Food Introduction and Eczema: A Systematic Review and a Meta-analysis
- S10 Vaccination and Allergic Sensitization in Early Childhood – The ALADDIN Birth Cohort
- S11 The Impact of a General Practitioner–Led Community Paediatric Allergy Clinic: A Service Evaluation

Environmental Exposures and Tobacco Smoke

- S11 Air Pollution Exposure and Lung Function Until Age 16 Years: The PIAMA Birth Cohort Study
- S12 Secondhand Smoke Exposure and Asthma Outcomes Among African-American and Latino Children With Asthma
- S12 Underestimation of House Dust Mite–Specific IgE With Extract-Based ImmunoCAPs Compared With Molecular ImmunoCAPs

Anaphylaxis

- S13 Anaphylaxis Food-Induced in Infants and Children
- S14 Increased Use of Adrenaline in the Management of Childhood Anaphylaxis Over the Last Decade
- S14 Risk Factors for Multiple Epinephrine Doses in Food-Triggered Anaphylaxis in Children
- S15 Analysis of Value-Based Costs of Undesignated School Stock Epinephrine Policies for Peanut Anaphylaxis

Drug Allergy

- S15 Antibiotic Allergy Labels in Children Are Associated With Adverse Clinical Outcomes
- S16 Hospitalizations in Children With a Penicillin Allergy Label: An Assessment of Healthcare Impact
- S16 Suspected Reaction With Cephalosporin May Be a Predictive Factor for β -Lactam Allergy in Children
- S17 Prospective Assessment of Diagnostic Tests for Pediatric Penicillin Allergy: From Clinical History to Challenge Tests
- S18 Provocation Tests in Nonimmediate Hypersensitivity Reactions to β -Lactam Antibiotics in Children: Are Extended Challenges Needed?
- S18 Efficacy and Safety of 5-Day Challenge for the Evaluation of Nonsevere Amoxicillin Allergy in Children

Allergic Rhinitis

- S19 Molecular Allergy Diagnostics Refine Characterization of Children Sensitized to Dog Dander
- S20 Efficacy of House Dust Mite Sublingual Tablet in the Treatment of Allergic Rhinoconjunctivitis: A Randomized Trial in a Pediatric Population

Allergic Skin Diseases

- S20 The Nonlesional Skin Surface Distinguishes Atopic Dermatitis With Food Allergy as a Unique Endotype
- S21 Antibiotic Choice and Methicillin-Resistant *Staphylococcus aureus* Rate in Children Hospitalized for Atopic Dermatitis
- S22 Association of Atopic Dermatitis With Sleep Quality in Children
- S22 Acquired Cold-Induced Urticaria in Pediatric Patients: A 22-Year Experience in a Tertiary Care Center (1996–2017)

Insect Sting Allergy

- S23 A Longitudinal Study of Hymenoptera Stings in Preschool Children

FOOD ALLERGY

IgE-Mediated Food Allergy

- S23 Early-Life Gut Microbiome and Egg Allergy
- S24 Cesarean Delivery, Preterm Birth, and Risk of Food Allergy: Nationwide Swedish Cohort Study of More Than 1 Million Children
- S25 Caregiver and Expecting Caregiver Support for Early Peanut Introduction Guidelines
- S25 Early Introduction of Egg and the Development of Egg Allergy in Children: A Systematic Review and Meta-analysis

- S26 The Health and Economic Outcomes of Early Egg Introduction Strategies
- S26 Relevance of Low Specific IgE Levels to Egg, Milk and Peanut in Infancy
- S27 Patterns of Tree Nut Sensitization and Allergy in the First 6 Years of Life in a Population-Based Cohort
- S28 The Public Health Impact of Parent-Reported Childhood Food Allergies in the United States
- S28 Egg Allergen Specific IgE Diversity Predicts Resolution of Egg Allergy in the Population Cohort HealthNuts
- S29 Differences in Egg and Milk Food Challenge Outcomes Based on Tolerance to the Baked Form
- S30 Oral Food Challenge Failures Among Foods Restricted Because of Atopic Dermatitis
- S30 Long-term Follow-up After Baked Milk Introduction
- S31 AR101 Oral Immunotherapy for Peanut Allergy
- S31 Real-World Experience With Peanut Oral Immunotherapy: Lessons Learned From 270 Patients
- S32 Oral Immunotherapy for Peanut Allergy (PACE): A Systematic Review and Meta-analysis of Efficacy and Safety
- S33 Peanut Gastrointestinal Delivery Oral Immunotherapy in Adolescents: Results of the Build-up Phase of a Randomized, Double-Blind, Placebo-Controlled Trial (PITA Study)
- S34 Effect of Epicutaneous Immunotherapy Versus Placebo on Reaction to Peanut Protein Ingestion Among Children With Peanut Allergy: The PEPITES Randomized Clinical Trial

Non-IgE-Mediated Food Allergy

- S35 Food Protein-Induced Enterocolitis Syndrome Food Challenges: Experience From a Large Referral Center
- S35 Food Protein-Induced Enterocolitis Syndrome: Data From a Multicenter Retrospective Study in Spain
- S36 Phenotypic Characterization of Eosinophilic Esophagitis in a Large Multicenter Patient Population From the Consortium for Food Allergy Research
- S36 Specific IgG4 Antibodies to Cow's Milk Proteins in Pediatric Patients With Eosinophilic Esophagitis
- S37 Long-term Treatment With Proton Pump Inhibitor Is Effective in Children With Eosinophilic Esophagitis
- S38 Safety and Efficacy of Reslizumab for Children and Adolescents With Eosinophilic Esophagitis Treated for 9 Years

ASTHMA

Risk Factors

- S38 Birth Weight for Gestational Age and the Risk of Asthma in Childhood and Adolescence: A Retrospective Cohort Study
- S39 Gestational Age at Birth and Wheezing Trajectories at 3–11 Years
- S40 Impact of Parental Asthma, Prenatal Maternal Asthma Control, and Vitamin D Status on Risk of Asthma and Recurrent Wheeze in 3-Year-Old Children
- S41 High-Dose Vitamin D Supplementation During Pregnancy and Asthma in Offspring at the Age of 6 Years
- S41 Environmental Tobacco Smoke Affects Lung Function of Preschoolers With Asthma Even After a Decade
- S42 Exposure to Indoor Endocrine-Disrupting Chemicals and Childhood Asthma and Obesity
- S42 Being Overweight or Obese and the Development of Asthma

- S43 Food Allergy Is an Important Risk Factor for Childhood Asthma, Irrespective of Whether It Resolves
- S44 Association of Food Allergy and Decreased Lung Function in Children and Young Adults With Asthma
- S44 Impact of Community Respiratory Viral Infections in Urban Children With Asthma
- S45 Infant Viral Respiratory Infection Nasal Immune-Response Patterns and Their Association With Subsequent Childhood Recurrent Wheeze
- S45 Phenotypes of Recurrent Wheezing in Preschool Children: Identification by Latent Class Analysis and Utility in Prediction of Future Exacerbation
- S46 Non-Atopic Rhinitis at Age 6 Is Associated With Subsequent Development of Asthma
- S46 Remission of Persistent Childhood Asthma: Early Predictors of Asthma Outcomes
- S47 Very Poorly Controlled Asthma in Urban Minority Children: Lessons Learned
- S48 Airway and Esophageal Eosinophils in Children With Severe Uncontrolled Asthma

Diagnosis and Management

- S48 Evaluation of Clinically and Physiologically Atypical Asthma: If It Doesn't Wheeze It May Still Be Asthma
- S49 Successful Chest Radiograph Reduction by Using Quality Improvement Methodology for Children With Asthma
- S50 A Computerized Decision Support Tool To Implement Asthma Guidelines for Children and Adolescents
- S50 Acceptance and Commitment Therapy for Parental Management of Childhood Asthma: An RCT
- S51 Effectiveness of Pediatric Asthma Pathways for Hospitalized Children: A Multicenter, National Analysis
- S52 Home Medication Readiness for Preschool Children With Asthma
- S53 Children With Poorly Controlled Asthma: Randomized Controlled Trial of a Home-Based Environmental Control Intervention
- S53 Building Bridges for Asthma Care: Reducing School Absence for Inner-City Children With Health Disparities
- S54 School-Supervised Use of a Once-Daily Inhaled Corticosteroid Regimen: A Cluster Randomized Trial
- S55 The Impact of Adenotonsillectomy on Pediatric Asthma

Medical Therapies

- S55 Errors in the Use of Inhalers by Health Care Professionals: A Systematic Review
- S56 The Efficacy and Safety of Fluticasone/Salmeterol Compared to Fluticasone in Children Younger Than Four Years of Age
- S57 Combined Analysis of Asthma Safety Trials of Long-Acting β_2 -Agonists
- S58 Lung-Restricted Inhibition of Janus Kinase 1 Is Effective in Rodent Models of Asthma

IMMUNOLOGY

- S58 Newborn Screening for Severe Combined Immunodeficiency and T-Cell Lymphopenia in California, 2010–2017
- S59 T-Cell Receptor Excision Circles in HIV-Exposed, Uninfected Newborns Measured During a National Newborn Screening Program for Severe Combined Immunodeficiency

- S60 **Detecting 22q11.2 Deletion Syndrome in Newborns With Low T Cell Receptor Excision Circles From Severe Combined Immunodeficiency Screening**
- S60 **Inherited p40^{phox} Deficiency Differs From Classic Chronic Granulomatous Disease**
- S61 **Persistence of Pneumococcal Antibodies After Primary Immunisation With a Polysaccharide-Protein Conjugate Vaccine**
- S62 **Hematopoietic Stem Cell Transplantation for Progressive Combined Immunodeficiency and Lymphoproliferation in Patients With Activated Phosphatidylinositol-3-OH Kinase δ Syndrome Type 1**
- S62 **Jakinibs for the Treatment of Immune Dysregulation in Patients With Gain-of-Function Signal Transducer and Activator of Transcription 1 (STAT1) or STAT3 Mutations**
- S63 **Reprogramming Human T Cell Function and Specificity With Non-Viral Genome Targeting**

doi: 10.1542/peds.2019-2461
