ARTICLES

-   **School Shootings in the United States: 1997–2022** 18
- School shootings have risen in the United States over the past 25 years. This public health crisis merits continued attention. Effective interventions may attenuate this crisis.
- Luke J. Rapa, Antonis Katsiyannis, Samantha N. Scott, Olivia Durham*
-     **National Quality Indicators in Pediatric Sickle Cell Anemia** 22
- In this article, we report the quality of care received by children with sickle cell anemia (SCA) in Georgia and California from 2010 to 2019.
- Ashaunta T. Anderson, Wendy J. Mack, Sophia S. Horiuchi, Susan Paulukonis, Mei Zhou, Angela B. Snyder, Jason N. Doctor, Michele Kipke, Thomas Coates, Gary Freed*
-   **Sex-Specific Developmental Scales for Surveillance** 26
- This nationwide study evaluates sex-related differences in attainment rates of developmental milestones, demonstrating that females typically precede males, and suggesting utilization of sex-specific scales.
- Tamar Sudry, Guy Amit, Deena R. Zimmerman, Meytal Avgil Tsadok, Ravit Baruch, Hadar Yardeni, Pinchas Akiva, Dror Ben Moshe, Eitan Bachmat, Yair Sadaka*
-   **Disposable E-Cigarette Use and Subsequent Use Patterns in Adolescents and Young Adults** 29
- Adolescents and young adults who use disposable e-cigarette devices may be associated with higher risks for persistent e-cigarette use.
- Dae-Hee Han, Alyssa F. Harlow, Sarah W. Feldstein Ewing, Janet E. Audrain-McGovern, Jennifer B. Unger, Steve Y. Sussman, Rob McConnell, Jessica L. Barrington-Trimis, Adam M. Leventhal*
-   **Biomarker Assessment of Nicotine Exposure Among Adolescent E-Cigarette Users: 2018–2019** 34
- This study assessed the levels of nicotine exposure by vaping status, vaping frequency, and e-cigarette flavors among US adolescent e-cigarette users.
- Hongying Daisy Dai, Tzuyu Michaud, Nicolas Guenzel, Mathuri Morgan, Samuel M. Cohen*

ARTICLES (continued)		
	The Tension Between AAP Safe Sleep Guidelines and Infant Sleep	35
	• This mixed methods study examined tension mothers experience when attempting to follow American Academy of Pediatrics safe sleep guidelines while simultaneously enhancing infant and parental sleep.	
	<i>Rachel Y. Moon, Jodi A. Mindell, Sarah Honaker, Sarah Keim, Kristin J. Roberts, Rebecca J. McAdams, Lara B. McKenzie</i>	
	Bilirubin Measurement and Phototherapy Use After the AAP 2022 Newborn Hyperbilirubinemia Guideline	36
	• In this article, we examine clinical outcomes after the publication of the updated neonatal hyperbilirubinemia guidelines, including rates of phototherapy, serum bilirubin measurements, and hospital readmissions.	
	<i>Leela Sarathy, Joseph H. Chou, Giuseppina Romano-Clarke, Katherine A. Darci, Paul H. Lerou</i>	
 	Endotracheal Tube Size Adjustments Within Seven Days of Neonatal Intubation	37
	• This study demonstrates that intubation with an endotracheal tube that is 0.5 mm smaller than recommended by current guidelines may be appropriate for some infants.	
	<i>Patrick J. Peebles, Erik A. Jensen, Heidi M. Herrick, Paul J. Wildenhain, Jennifer Rumpel, Ahmed Moussa, Neetu Singh, Ayman Abou Mehrem, Bin Huey Quek, Michael Wagner, Nicole R. Pouppirt, Kristen M. Glass, David G. Tingay, Kate A. Hodgson, Joyce E. O'Shea, Taylor Sawyer, Brianna K. Brei, Philipp Jung, Jennifer Unrau, Jae H. Kim, James Barry, Stephen DeMeo, Lindsay C. Johnston, Akira Nishisaki, Elizabeth E. Foglia</i>	
 	CPAP Versus NIPPV Postextubation in Preterm Neonates: A Comparative-Effectiveness Study	40
	• In this pragmatic, comparative-effectiveness study in preterm neonates, continuous positive airway pressure (CPAP) was not noninferior to nasal intermittent positive pressure ventilation (NIPPV) for failure but was noninferior for the risk of reintubation.	
	<i>Amit Mukerji, Brooke Read, Junmin Yang, Michelle Baczynski, Eugene Ng, Michael Dunn, Guillaume Ethier, Ayman Abou Mehrem, Marc Beltempo, Christine Drolet, Orlando da Silva, Deepak Louis, Brigitte Lemyre, Jehier Afifi, Balpreet Singh, Rebecca Sherlock, Miroslav Stavel, Edith Masse, Jaideep Kanungo, Jonathan Wong, Jaya Bodani, Faiza Khurshid, Kyong-Soon Lee, Sajit Augustine, Caio Barbosa de Oliveira, Hala Makary, Alana Newman, Cecil Ojah, Prakesh S. Shah</i>	
	Rate of Urinary Tract Infections, Bacteremia, and Meningitis in Preterm and Term Infants	41
	• In this large multicenter retrospective cohort of febrile infants, we found that preterm infants did not have higher rates of bacteremia and meningitis compared with term infants.	
	<i>Thomas Graf, Sindhoosha Malay, Erin Frank</i>	
	Presentations and Outcomes Among Infants ≤90 Days With and Without SARS-CoV-2	42
	• A prospective, multinational study comparing clinical presentations and outcomes among infants aged 0 to 90 days with and without severe acute respiratory syndrome coronavirus 2 infection tested in emergency departments.	
	<i>Brett Burstein, Vikram Sabhaney, Todd A. Florin, Jianling Xie, Nathan Kuppermann, Stephen B. Freedman, on behalf of the Pediatric Emergency Research Network and Pediatric Emergency Research Canada coronavirus disease 2019 study teams</i>	
 	Vaccine Effectiveness Against Long COVID in Children	43
	• Vaccination against coronavirus disease 2019 has a protective effect against long coronavirus disease 2019 in children and adolescents. The effect wanes over time but remains significant at 12 months.	
	<i>Hanieh Razzaghi, Christopher B. Forrest, Kathryn Hirabayashi, Qiong Wu, Andrea J. Allen, Suchitra Rao, Yong Chen, H. Timothy Bunnell, Elizabeth A. Chrischilles, Lindsay G. Cowell, Mollie R. Cummins, David A. Hanauer, Miranda Higginbotham, Benjamin D. Horne, Carol R. Horowitz, Ravi Jhaveri, Susan Kim, Aaron Mishkin, Jennifer A. Muszynski, Susanna Naggie, Nathan M. Pajor, Anuradha Paranjape, Hayden T. Schwenk, Marion R. Sills, Yacob G. Tedla, David A. Williams, L. Charles Bailey, on behalf of the RECOVER CONSORTIUM</i>

ARTICLES (continued)

 **Causal Mediation of Neighborhood-Level Pediatric Hospitalization Inequities** 44

• Causal inference methods applied to a population-wide pediatric hospitalization registry determined the mediation of neighborhood-level racial and ethnic inequities by social, economic, and environmental exposures.

Cole Brokamp, Margaret N. Jones, Qing Duan, Erika Rasnick Manning, Sarah Ray, Alexandra M.S. Corley, Joseph Michael, Stuart Taylor, Ndidi Unaka, Andrew F. Beck, on behalf of the RISEUP RESEARCH TEAM

 **Direct Admission Program Implementation: A Qualitative Analysis of Variation Across Health Systems** 45

• In this study, we describe variation in the implementation of a direct admission program across 3 health systems from the perspectives of parents and multidisciplinary clinicians.

Jordan A. Taylor, Corrie E. McDaniel, Cathryn A. Stevens, Elizabeth Jacob-Files, Stephanie C. Acquilano, Seneca D. Freyleue, Ryan Bode, Guliz Erdem, Kristyn Felman, Stephanie Lauden, Martha L. Bruce, JoAnna K. Leyenaar

 **A Short Adverse Experiences Measure Among Mothers of Young Children** 46

• A 2-item adverse childhood experience measure performed well to identify mothers of young children in an urban pediatric emergency department who may have experienced significant child adversity.

Félice Lè-Scherban, Anqi Wang, Kelly A. Courts, Stephanie Ettinger de Cuba, Roy Wade Jr, Mariana Chilton

    **Universal Free School Meals Policy and Childhood Obesity** 47

• In a balanced sample of low-income California schools between 2013 and 2019, participation in the Community Eligibility Provision (CEP) was associated with a net decrease in obesity prevalence.

Anna M. Localio, Melissa A. Knox, Anirban Basu, Tom Lindman, Lina Pinero Walkinshaw, Jessica C. Jones-Smith

  **Psychotropic Medication Administration in Pediatric Emergency Departments** 48

• Administration of psychotropic medications to children with mental and behavioral health conditions in pediatric emergency departments is increasing, with significant associated hospital-level variation.

Ashley A. Foster, Jennifer A. Hoffmann, Zheala Qayyum, John J. Porter, Michael Monuteaux, Joel Hudgins

 **Health Conditions, Education Services, and Transition Planning for Adolescents With Autism** 49

• In this article, we describe the prevalence of and disparities in cooccurring health conditions, educational services, and transition planning among adolescents with autism.

Michelle M. Hughes, Elise T. Pas, Maureen S. Durkin, Leann S. DaWalt, Deborah A. Bilder, Amanda V. Bakian, Esther Amoakohene, Kelly A. Shaw, Mary E. Patrick, Angelica Salinas, Monica DiRienzo, Maya Lopez, Susan Williams, Dedria McArthur, Allison Hudson, Christine M. Ladd-Acosta, Yvette D. Schwenk, Thaer M. Baroud, Ashley Robinson Williams, Anita Washington, Matthew J. Maenner

 **8-Year Follow-up of a Maternal Education Trial in a Low-Resource Setting** 50

• In this follow-up 8 years after a randomized maternal education intervention in rural Uganda, child development remained improved in the intervention group compared with controls.

Paul Kakwangire, Grace Muhoozi, Moses Ngari, Nicholas Matovu, Ane Cecilie Westerberg, Per Ole Iversen, Prudence Atukunda

ARTICLES (continued)

-   **Efficacy of Early Intervention for Infants With Cerebral Palsy in an LMIC: An RCT** 51
- A parent-delivered early intervention improves motor skills in ambulatory infants at risk for cerebral palsy in a low- and middle-income country.
- Katherine A. Benfer, Koa Whittingham, Robert S. Ware, Asis Kumar Ghosh, Sayak Chowdhury, Golam Moula, Sandip Samanta, Naila Zaman Khan, Kristie L. Bell, Stina Oftedal, Sasaka Bandaranayake, Alison T. Salt, Anjan Bhattacharya, Pradip Maiti, Santanu K. Tripathi, Cathy Morgan, Iona Novak, Roslyn N. Boyd*
-    **Meaning-Making Among Parents of Children With Severe Neurologic Impairment in the PICU** 52
- In this PICU study among parents of children with severe neurologic impairment, meaning-making experiences focused on appreciation/acceptance, adaptability/accountability, valuing all lives, and learning/teaching about their child.
- Jori F. Bogetz, Ellie Oslin, Maeve O'Donnell, Krysta S. Barton, Joyce P. Yi-Frazier, R. Scott Watson, Abby R. Rosenberg*
-  **Global Burden of Tuberculosis in Adolescents and Young Adults: 1990–2019** 53
- This study assessed the trend of tuberculosis burden in adolescents and young adults from 1990 to 2019 at global, regional, and national levels, using Global Burden of Disease study 2019 database.
- Weijing Shang, Guiying Cao, Wenzhan Jing, Jue Liu, Wannian Liang, Min Liu*
-  **Predictors of the Outcome at 2 Years in Neonates With Congenital Cytomegalovirus Infection** 54
- With this study, we aimed to identify predictive markers of long-term outcomes in cases of congenital cytomegalovirus infection diagnosed at birth.
- Jacques Fourgeaud, Jean-François Magny, Sophie Couderc, Patricia Garcia, Anne-Marie Maillotte, Melinda Benard, Didier Pinquier, Philippe Minodier, Dominique Astruc, Hugues Patural, Sophie Parat, Bernard Guillois, Armelle Garenne, Tiffany Guilleminot, Marine Parodi, Laurence Bussi eres, Idir Ghout, Yves Ville, Marianne Leruez-Ville*
-  **Long-term Ocular Outcomes in Congenital Toxoplasmosis Treated Perinatally** 55
- Retinochoroiditis is not a rare event (even in adulthood) in patients with congenital toxoplasmosis screened prenatally, warranting regular follow-up, but rarely causing severe functional damage.
- Antoine Journ e, Justus Garweg, El a Ksiazek, Fran ois Peyron, Christine Binquet, Martine Wallon*
-  **Neonatal Ultrasound and Radiographic Markers of Hip Dysplasia in Young Adults** 56
- This longitudinal study examines associations between neonatal hip ultrasound phenotypes and radiographic acetabular dysplasia in young adults. In females, significant associations were revealed.
- Lene B. Laborie, Hanne Rasmussen, Kaya K. Jacobsen, Trude Gundersen, Karen Rosendahl*

QUALITY REPORTS

U **Improving Documentation of Firearm Access During Pediatric Emergency Visits for Suicidal Ideation** 67

- In this article, we describe a quality improvement initiative to implement templated phrasing to improve the documentation of firearm access and storage among children with suicidal ideation in the pediatric ED.

Samaa Kemal, Tyler Lennon, Norma-Jean Simon, Kim Kaczor, Mallory Hilliard, Jacqueline B. Corboy, Jennifer A. Hoffmann

Reducing Time to Postintubation Sedation in a Pediatric Emergency Department 68

- This study presents strategies to reduce postintubation sedation in a pediatric emergency department through an interprofessional, iterative learning process.

Glaci Ayers, David P. Johnson, Lacey Noffsinger, S. Barron Frazier

CASE REPORTS—Online only at www.pediatrics.org

Altered Mental Status and Cardiac Failure Due to Thiamine Deficiency in an Overweight Teen

- This case highlights the presentation of a teenager with altered mentation and weakness as a result of severe thiamine deficiency.

Brittany M. Slagle, Trevor Meece, Claire Foster, Andrew Campbell, Lauren Tong, Paul Drake

NIH **Nausea and Vomiting as Initial Manifestations of Pediatric NMOSD**

- Neuromyelitis optica spectrum disorder area postrema syndrome should be considered in the differential diagnosis of pediatric patients with nausea and vomiting if common diagnoses cannot be confirmed and the clinical course is chronic, unresponsive to antiemetics, and complicated by neurologic findings or persistent hiccups.

Ana Maria Cabal Herrera, Quinton Mandle, Hersh Varma, Setty Magaña

Acquired Hemophilia: A Rare Complication of Pediatric Idiopathic Multicentric Castleman Disease

- Acquired hemophilia is exceedingly rare in pediatrics. We discuss this rare finding and its treatment in a patient with idiopathic multicentric Castleman disease.
