

The PCG™ Pneumo-CardioGram Recording: An advanced technique for detecting and quantitating periods of apnea and/or bradycardia.

Two years ago Clinical Data introduced the Pediatric Pneumogram¹—a continuous recording of respiration.

Now we introduce the Pneumo-CardioGram—an advanced technique for recording respiration and ECG simultaneously for a 12 or 24 hour period.

The timeliness of a 12-hour recording is especially helpful in evaluating and documenting the effectiveness of pharmacological intervention, such as theophylline or caffeine. A 24-hour recording provides more data to analyze the clinical significance of suspected apneic periods and any accompanying arrhythmia.

The recording is performed using a miniature battery-operated FM cassette

recorder which sits in the crib with the infant. The recorder is provided at no capital expense, and provides continuous data over a 12 or 24 hour period.

Our facilities operate 24 hours a day, seven days a week. There, trained medical personnel

using a proprietary computer-assisted playback system review the entire recording, and identify apneic episodes and arrhythmia. A verbal report is telephoned to you immediately and a printed report follows, usually within 24 hours.

We'll gladly send you a sample PCG Report to show you how helpful this unique service can be. (We continue to offer our PPG™ recording for respiration only.) Call us toll free 800-225-9180, (In Mass., 734-3700).

Clinical Data, Inc.

1371 Beacon Street, Brookline, Massachusetts 02146 800-225-9180

□

CALIFORNIA—Fellowship in Pediatric ICU available immediately and/or July 1, 1981. Active 36-bed ICU with strong clinical and research opportunities. Contact Edgardo L. Arcinue, MD, Childrens Hospital of Los Angeles, PO Box 54700, Los Angeles, CA 90054.

MEETING ANNOUNCEMENTS

"The Diagnosis and Treatment of Reye's Syndrome" will be the subject of a National Institutes of Health Consensus Development Conference to be held March 2-4, 1981, in Masur Auditorium, in the NIH Clinical Center (Building 10), Bethesda, Maryland.

The National Institute of Neurological and Communicative Disorders and Stroke is the lead Institute for this conference. Other sponsors are the National Institute of Allergy and Infectious Diseases, the National Institute of Arthritis, Metabolism, and Digestive Diseases, the National Institute of Child Health and Human Development, the National Institute of Environmental Health Sciences, and the Division of Research Resources. Collaborating agencies are the Center for Disease Control and the National Center for Health Statistics. Assistance will be provided by the NIH Office for Medical Applications of Research.

This Consensus Development Conference will bring together biomedical research scientists, practicing physicians, consumers, and experts in fields relevant to a thorough discussion of the diagnosis and treatment of Reye's syndrome.

The purpose of the conference is to reach agreement on a scientific evaluation of the criteria for diagnosis and treatment of Reye's syndrome. In considering this condition, key questions to be addressed include: What is Reye's syndrome? What symptoms should alert parents? What other conditions may present similar symptoms? When should parents seek medical evaluation of their child? Which tests are helpful in diagnosing Reye's syndrome? What early treatments are useful for noncomatose patients? What are the indications for and risks of intensive care? What are the indications for monitoring intracranial pressure? Is barbiturate coma useful?

After two days of presentations and discussion, a consensus statement will be developed and read publicly on the morning of March 4. The statement will encompass both the scientific issues and the concerns of families.

For technical information, contact: Dr Joseph S. Drage, Chief, Developmental Neurology Branch, NDP, NINCDS, Room 816, Federal Building, 7550 Wisconsin Ave, Bethesda, MD 20205, (301) 496-6701.

For administrative information, contact: Yvonne P. Lewis, Prospects Associates, 11325 Seven Locks Rd, Suite 221, Potomac, MD 20854, (301) 983-0535.

University of Illinois and Illinois Masonic Medical Center, Departments of Pediatrics, combined international conference on "Historical Perspectives and Recent Advances in Perinatal Medicine."
